

# Winter Ecology ✧ Spring 2008

A Field Course at CU's Mountain Research Station

*5 Weekends \* 2 Credits*

Open to students from all colleges and universities

- \* Wintertime offers insights into the natural history of organisms and ecosystems which are often not appreciated in summer visits to the mountains \*
- \* Join us in the field to study physical and biological cold-season processes that shape landscapes and 'growing season' dynamics in the Rockies \*

**Instructor:** Dr. Tim Kittel, INSTAAR

**Dates & Times – 5 weekends:** Sat 9 Feb - Sat 8 Mar 2008

- Saturday – 9a-4:30p and 7-8.30p
- Sunday – 9a-4:30p (first 4 weekends only)

**Format:** Lectures, Field/Lab work, Evenings with Guest Speakers

**Topics:** Climate, snowpack, vegetation, soil ecology, mammalogy, ornithology, limnology

• **Credits: 2**

- ❖ Ecology & Evolutionary Biology: EBIO 4120, Sec 570
- ❖ on-line registration

• **Tuition & Fees: \$950.**

- ☞ includes lodging at the new Science Lodge
- ☞ meals to be arranged separately

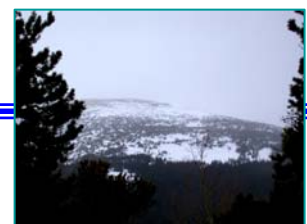

Open to students from all colleges and universities

- Prerequisite: 1 year college general biology and/or environmental science
- Class requirements: Field Exercises, Exams, Individual Project
- **Meets field course requirements for CU's Environmental Studies program**
